Jaymes Bunce

System Administrator | Linux, Google Workspace, Networking, Automation

Logan, UT (Ready to Relocate) | linkedin.com/in/jaymes-bunce | www.jaymesbunce.com

SUMMARY

System Administrator with 6+ years at Conservice supporting 3,000+ users across Linux, Windows and Mac, networking, Google Workspace and Microsoft 365, and automation (Ansible, PowerShell, Docker). Google Workspace Administrator certified. Replaces manual work with automation: SSL issuance for 50+ servers, audits cut from 3 days to 1. Looking to bring that to a growing IT team.

EXPERIENCE

Conservice | Logan, Utah

System Administrator II June 2022 - Present

- Administer Google Workspace for 3,000+ users: Single Sign-On for 20+ services, email routing for 5+ departments, and Proofpoint filtering of 4 million+ monthly emails.
- Run OpenVPN for 1,800+ remote staff across 4 regions and deploy firewalls that cut unauthorized access.
- Automate IT processes with Ansible and PowerShell, cutting audits from 3 days to 1.
- Replaced a manual SSL process with automation that issues real-time certificates for 50+ servers.
- Implemented Zabbix, Uptime Kuma and PagerDuty monitoring to cut incident response times.
- Maintain Linux servers and Docker environments (26+ services), keeping them reliable and patched.
- Administer WebTitan filtering on 2,800+ devices to block malicious and unsafe sites.
- Manage 30+ Ubiquiti access points across 4 buildings.

IT Help Desk January 2022 - June 2022

- Provided Tier 1-2 support for 3,000+ local and remote employees, resolving hardware and software issues within 1 hour, and assisted with Google Workspace and Microsoft 365 administration.
- Scripted computer formatting in KACE, cutting the average format time by 1 hour.
- Built a Wiki.js knowledge base for troubleshooting procedures, reducing training time for new hires.
- Created a PowerShell toolkit of repetitive fixes that let the team resolve tickets faster.

Electronic Data Exchange: Processor, Manager, Setup Specialist January 2020 - January 2022

- Coordinated with ~170 clients to configure and troubleshoot electronic data exchange systems.
- Set up 150-200 properties per month in the internal system to process utility charges, meeting contracted deadlines.
- Covered other team members' portfolios during time off and trained a new employee to take over mine.
